NET 'N' CLEAN IN FLOOR CLEANING

- ✓ Automatically cleans the pool
- ✓ Improved water circulation
- ✓ Improves water chemical distribution
- ✓ Improves distribution of heated water
- ✓ Reduces pool maintenance
- ✓ Eliminates unsightly hoses and moving cleaners from your pool

NET 'N' CLEAN INFLOOR CLEANING

AstralPool's Net'n'Clean built-in system provides an efficient, easy to use option for cleaning all types of pools. Its low energy consumption minimizes operating costs overall. The Net'n'Clean system also helps circulate pool chemicals and warm (or cool) water for even distribution and a consistent result.

THE PERFECT PRISTINE POOL

Your swimming pool is not just a place to escape the summer heat, but is the center piece of your back yard oasis. Aside from providing the ideal exercise medium, your pool is often the focus for family and friends. So why not have it looking pristine all the time? Swimming pools always look their best with sparkling water free from dirt, leaves, cleaners and hoses.

With AstralPool's Net'n'Clean in floor pool cleaner you can have a cleaning system that is virtually invisible, automatic and totally integrated into your filtration system. Every day, up to 99% of your pool, including steps and swim outs is automatically cleaned, removing leaves and debris.

HOW DOES IT WORK?

The Net'n'Clean system is comprised of a series of nozzles installed in the bottom of the pool (the number of nozzles will depend on the pool size and shape) as well as one or more distribution valves that direct pressurized water through each nozzle branch sequentially. Water flows out at high pressure through the nozzles and forces the debris to the main suction while lifting fine particles into suspension where they are collected by the skimmer and deposited into the filtration system.

WHAT'S UNIQUE ABOUT ASTRALPOOL'S IN FLOOR CLEANING SYSTEM?

The Distribution Valve is hydraulically driven and systematically controls the sequence of the nozzles to ensure that all debris moves towards the main drain to be collected by the filtration equipment.

EASY TO MAINTAIN

Made of corrosion proof materials, the distribution valve is easy to maintain with no special assembly tools required and a minimum number of internal parts.

FLUSH FIT

A unique Riser Pipe combines with the nozzles for installation in concrete pools and allows easy alignment and leveling of the nozzles for the perfect finish in your pool.

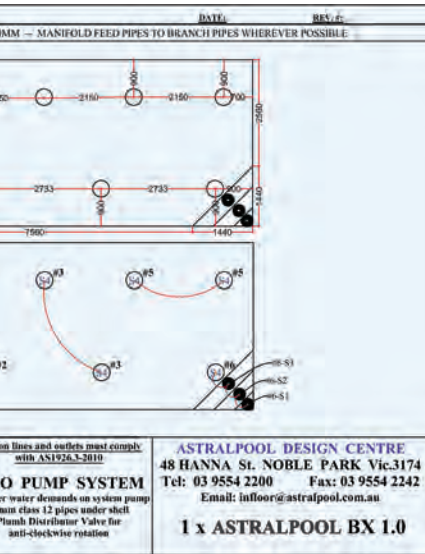

NOZZLES THAT CLEAN

AstralPool's in floor nozzles are available for concrete, fiberglass or vinyl liner pools. A unique system of rotating the nozzle assembly allows the installer to select a different pressure and flow rate from each individual nozzle to perfectly suit the location in the pool – floor, steps, swim out or spa. The nozzles incorporate a ball and socket function that allow for perfect alignment on sloping floors. And depending on your taste nozzles are available in six colours to match your pool interior.

NET 'N' CLEAN INFLOOR CLEANING

COMPLETE ENGINEERING

AstralPool also offer a complete design service through our dealers to plan the exact location each nozzle is installed in the pool to obtain the ultimate cleaning result.

TOTAL CONTROL

Combined with the AstralPool's Connect 10 Pool and Spa Controller, your whole pool filtration and in floor cleaning system is easily integrated for perfect cleaning while maximising energy savings.

CONTROL ANYWHERE

Connect 10 internet gateway allows you to control your pool via your smart phone, tablet or computer from anywhere in the world and can communicate and give control over sanitizing, water balance, temperature, lighting and operating hours.
