Harness the power of the web for the perfect pool control experience

## EASY TO SELL. EASY TO INSTALL. EASY TO USE.

When it comes to pool control, AquaLink® systems have been long known for innovation and reliability. And, with the seamless addition of iQ30, adding the connected convenience of app-controlled pool automation is easier than ever.

Working with installers, electricians, and pool professionals, we developed a solution that enables WiFi setup to be done wirelessly using any smartphone, tablet, or laptop.

For pool owners, iQ30 improves WiFi reliability with a stronger signal that is compatible with virtually all residential routers. No unsightly wires or wall panels installed in the home or clutter-causing charging bases on the counter, owners get the same intuitive iAquaLink® experience — using the same free app.

### Give Pool Owners the Luxury and Convenience of Connected Pool Operation:

- Get the spa heated up before getting home so it's ready and waiting by the time they arrive
- Control when the pool cleaner starts simply by saying "Start my pool cleaner"
- Provide peace of mind while on vacation by adjusting pump run time for cost-saving efficiency
- Carefully monitor operation and control equipment at rental properties with ease
- Turn on lights and water features with just a tap on any smartphone or tablet

# EASY INSTALLATION

## EASY AS 1-2-3

- 1 Wire iQ30 Web-Connect Device to the AquaLink® Automation system.**

- 2 Start WiFi Setup Mode**  
Toggle the WiFi switch to Wired then set back to WiFi. This will clear any previous WiFi settings.

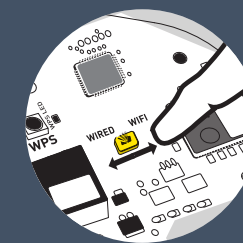

- 3 Connect iAquaLink to the WiFi network — Two ways to do this:**

## B. WPS Method — Requires physical access to a WPS-enabled router

Router

- 1** Press the WPS button on the router to start WPS setup.

iAquaLink

- 2** Within 2 minutes, press the WPS button inside the iQ30. The two devices will exchange a passcode and establish communication.

## A. WiFi Hotspot Method — Requires a smartphone, tablet, or laptop

- 1** After toggling the Wired / WiFi switch, make sure it is set to WiFi and use a smartphone or WiFi enabled device and go to WiFi settings. Connect to the network labeled iAquaLink.

- 2** Some devices will automatically redirect to the Login/Setup Screen. If not, open a browser and go to [www.iAquaLink.com](http://www.iAquaLink.com)

- 3** iAquaLink will display the networks it detects, as well as signal strength. Select the desired network to connect iQ30.  
*i* If prompted for a password, enter the password for the home network (case sensitive). will disconnect from the smartphone at this point.

- 4** The yellow and green LEDs will blink for up to 2 minutes while connecting. When they both turn solid, the iQ30 is connected.
