## The Power of Ozone

Combined with the liquid dosing precision of the **Chemigem**

The powerful Ozone generator sanitises the water. The Chemigem provides a safe residual of chlorine – optimising water safety and quality.

Pool Controls is proud to introduce a unique combination of ozone generator and precise liquid dosing system.

Proudly  
Manufactured in Australia

Industry research indicates that ozone **reduces chlorine demand by up to 80%**, potentially making the Ozone Chemigem the most efficient and effective water management system available today.

- O** Powerful ozone generator
- ⚙️** Fully-automated
- +** Full sanitiser control
- pH** Full pH control
- ⌚** Additional timed power outlets
- 3** 3 Year Warranty

# OZONE CHEMIGEM

The new Ozone Chemigem harnesses the power of ozone supported by the precise liquid dosing of the Chemigem in the latest addition to the Pool Controls range.

*Simply the most reliable, efficient and precise water management system.*

## How it works?

1

*Ozone is the frontline of defence* against bacteria and other pathogens in the water. Ozone is a powerful sanitiser and leaves no trace in the pool water after treatment.

2

*The Ozone Chemigem* uses a multi-electrode (probe) to monitor levels of chlorine and the pH of the water. Ozone dissipates immediately on contact with the water, so a safe residual of chlorine is required.

3

*Precise doses of liquid chlorine* and pool acid are added to the pool as required to provide a safe level of residual sanitiser and full pH control.

**Proudly made in Australia**

*Pool Controls is 100% Australian owned and all products are proudly manufactured in Australia.*

It is more important than ever to ensure that your swimming pool is correctly sanitised, perfectly balanced and safe to swim in. With over 40 years' experience, you can rely on Pool Controls to deliver high-quality, innovative and reliable products to protect the investment you have made in your swimming pool.
