

Turmion®

Backyard automation made easy

With Turmion® you can automate your plug in appliances – Wherever and whenever you want to control your appliances the Turmion® System is ideal.

Turmion® allows you to remotely turn on and off any electrical appliance around your swimming pool and spa, home and backyard, farm, construction and building site from a distance.

You can switch your devices on and off from your lounge chair or even while overseas with the Turmion® Pro.

Turmion®

The Turmion® Link Control Unit and remote allows you to remotely control two 10 amp power points at a single location. With the Master Control System you can preset them to come on and off as many times a day as you wish.

Turmion® Master Control Unit, Link Control Unit and 8 Channel Remote

With Turmion® you can:

- Turn appliances on and off remotely with the hand held remote or smart device.
- Create multiple programmed sequences to power devices on and off automatically.

Simply plug in your appliances to Turmion® and begin operating them with the remote control or smart device. Any device with a 10 amp power point (or optional 15 amp) can be stopped and started automatically.

Backyard automation has never been so easy!

Turmion® Pro

The Turmion® Pro System is available with either Bluetooth or WiFi connectivity. Both systems can be operated from your mobile phone with our free app and include the ability to set up timing as well as scene control.
