Key Product Features & Benefits

Swivel Cable Helps Prevent Tangling

The 18m floating cable features swivel to help prevent cable from tangling.

eBOX + Light Weight Caddy

The improved electronic control box, or eBOX, makes it easy to operate the cleaner at the touch of a button. The eBOX allows you to program the cleaner to run each day for up to 7 days when you go away on holiday. It indicates when the filter canister is full and it also allows you to activate the patented Lift System.

Patented Vortex Vacuum Technology

Vortex technology provides powerful and constant cyclonic suction. This allows the Vortex-Pro Robotic Cleaner to capture large debris such as gum nuts, twigs and eucalyptus leaves while not losing suction power throughout the cleaning cycle.

Large and super easy to clean filter canister

Never touch debris again thanks to the easy access and hygienic design of the filter canister. Clean and remove debris in a matter of minutes with minimum fuss.

Plug & Play Simple Installation

Simply plug the power cord into a regular 240V wall socket and press START on the control box. The Zodiac VX50 4WD starts cleaning whilst you relax.

Patented Lift System

Enjoy easier removal of the cleaner with 20% less effort.

Certified to Australian safety standards
